

JEB Incubator - Functional Documentation

This documentation describes the different features of the **JEB Incubator** website. Your experience depends on your account type:

Account Type	Description
 Unauthenticated	General public access
 Startup	Entrepreneurs and their companies
 Founder	Individuals who founded startups
 Partner	Individuals or entities that collaborate with startups
 Investor	Investment professionals
 Admin	Platform administrators

1. Features for Unauthenticated Users

 **Note:** There is a part of the website that you can access without an account, known as the **public part**.

1.1 Homepage

This is the page you land on when opening the website. This page is also accessible upon pressing the logo or the "Home" (first) button in the Navigation Bar.

✨ **Key Feature:** You can find featured startups here.

1.2 Search

Use this page to search for a specific startup. You can access this page by pressing the "Search" (second) button in the Navigation Bar.

Available Filters:

-  By name
-  By creation date
-  Match in description
-  Combination of filters

Action: Select a startup to see details and recent updates.

1.3 Discover

Use this page to discover new startups. You can access this page by pressing the "Discover" (third) button in the Navigation Bar.

How it works: Our algorithm will show you new, innovative startups you can browse. Select a startup to see details and recent updates.

1.4 Profile

Once you are logged in, the page shows:

- Basic account information
-  Dashboard button

2. User Journey for Startups

Prerequisites: In addition to the [features for unauthenticated users](#), you have access to a custom dashboard page. Access your dashboard by pressing the "Dashboard" button in the [profile](#) page.

2.1 Profile Creation

Step-by-step process:

1.  Go to the [profile](#) page
2.  Use the signup option to create the **account** of the startup
3.  Select the corresponding option in the field "type of account"
4.  Go to your dashboard (you will land on the "informations" page)
5.  Fill the fields to adjust your profile in the [public space](#)

Visibility: Others can access your profile through [search](#) and [discover](#) pages.

2.2 Creating Updates

Navigation: Go to your dashboard (cf [profile](#)) → Navigate to the "updates" tab

Features:

-  Interface to create updates
-  Manage previous updates
-  Updates are displayed under your profile in the [public space](#)

2.3 Messaging

Navigation: Go to your dashboard (cf [profile](#)) → Navigate to the "messaging" tab

As a startup, you can:

-  Discuss with investors
-  Communicate with other startups

Investor Indicators:

-  Investor supports your project
-  Investor is interested

3. User Journey for Investors

Prerequisites: In addition to the [features for unauthenticated users](#), you have access to a custom dashboard page. Access your dashboard by pressing the "Dashboard" button in the [profile](#) page.

3.1 Account Creation

How to create an investor account:

1.  Go to the [profile](#) page
2.  Use the signup option to create your **account**
3.  Select the corresponding option in the field "type of account"

3.2 Search and Contact Startups

Enhanced Features for Investors:

When logged in, you have access to a new "Contact" button on startup profiles in the [public space](#).

Where to find startups:

-  [Search](#) pages
-  [Discover](#) pages

Action: The contact button will redirect you to the messaging interface.

Dashboard Access: You can also go to your dashboard to find all of your messages in one place.

4. Admin Guide

Prerequisites: As an admin, you also have access to the [features for unauthenticated users](#). Access your dashboard by pressing the "Dashboard" button in the [profile](#) page.

4.1 Account Creation

 **Important:** Unlike other types of accounts, you **cannot create** an admin account yourself.

Account Creation Process:

1.  Contact support to request an admin account
2.  Complete verification processes
3.  Receive temporary credentials to your admin account
4.  **Change the temporary password** immediately

4.2 Stats

Dashboard Overview: When you access your dashboard, you land on the stats page where you can visualize:

Metric	Description
 Website Traffic	Affluence on the website
 Accounts Created	New user registrations
 Messaging Activity	Communication statistics

4.3 Administrating the Website

Access: In your dashboard, you can access the **administration interface**

User Management: Use filters to select startups or users

For Startups 

Action	Description
 Add projects	Create new startup profiles
 Delete projects	Remove startup profiles
 Edit profiles	Modify fields in their public space profile

For Users

Action	Description
 Generate password	Create a new temporary password
 Suspend account	Temporarily disable user access
